

# POINSETTIAS FOR PATIENTS

## 2020 Plant Order Form

Every year many patients are stuck in hospital over the holidays. Little fresh poinsettias growing by their beds will add holiday cheer. This year, you can be a **FrontLine Santa**. Purchase one or more **FrontLine Santa plants** for only \$20 each and we will deliver your generous anonymous gift to an essential worker. **ORDERING DEADLINE** November 15<sup>th</sup>.

You can use our online shop ([shop.vgha.ca](http://shop.vgha.ca)) or the form below (include cash or cheque payable to VGH Auxiliary).

Be a **FrontLine Santa!**  
Give an anonymous gift to a  
essential worker \$20.  
**DEADLINE NOV 15th**

Lab tests are stressful, especially for kids. Help make children's lab visits more positive, relaxing, and calm. Buy holiday plants and we'll be able to renovate the kids' blood collection room at the Vic General lab 2N

## WE'RE PROUD OF OUR POINSETTIAS

**Top Quality:** Our plants are locally grown and of the highest quality. They are nurtured for six months from cuttings in a special space in Hilltop's greenhouse resulting in large, bushy plants.

**Safe:** Many people worry about poinsettias being poisonous if eaten by their pets or young children. Contrary to popular belief, they are not toxic, although in some cases ingestion of the leaves can cause vomiting or diarrhea. Contact with the sap can cause a rash.

The hospital **AUXILIARY** began when the hospital was built 37 years ago. We have raised over three million dollars' worth of equipment and amenities, mainly thru' our hospital giftshop.

**POINSETTIAS FOR PATIENTS** over the years has bought a treadmill, a stretcher, a baby-blanket warmer, several biliblankets for jaundiced newborns, and a bilirubin meter. Last year & this year too we want to give the tiniest patients a calm atmosphere when they have to go to the lab at 2North.

The kids win; the hospital wins; and you win – all because you buy our fabulous plants.

### Pickup details:

Fri. Nov 27, 4-8pm  
Sat. Nov 28, 9-noon

**Strawberry Vale  
Community Centre**

**11 High St, Victoria**

### **Thanks from the kids!**

#### **PLANT CARE**

Keep your potted poinsettia at normal room temperature in bright filtered light, for example, sunlight filtered through a shade or curtain, and out of drafts. Water only when slightly drooping. The potting mixture should then be thoroughly saturated. Under favourable conditions the coloured bracts will remain attractive for months.
